## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 6 recites the broad recitation "paging channel known per se", and the claim also recites "preferably on a FACCH or SACCH channel" which is the narrower statement of the range/limitation.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-3, 5 and 7-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Kari, PCT/FI97/00020.

**Claims 1, 7, 8 and 9:** Kari discloses a system, MS and arrangement for paging said MS to establish a GPRS (packet-switched) connection in a GSM (circuit-switched) system whereby the GPRS system may page the MS to respond by switching to the GSM system, and the MS may listen to the GSM paging channels for a subsequent page from the system to establish a GPRS connection whereby the MS, upon receiving a page with information, will respond by switching to the GPRS connection (page 3 line 24-page 4 line 32). **Claims 2 and 3:** Kari discloses a system comprising a node, PSTN and GMSC communicating with an HLR/VLR

Application/Control Number: 09/539,013

Art Unit: 2617

(page 9 line 13-page 11 line 20), the node storing the identification of mobile stations in the system and establishing a call to set up a call request through a visitor MSC (page 12 lines 6-23, page 14 lines 19-page 15 line 29) using a forwarded location and roaming number. **Claim 5:** the paging channel would inherently be known per se.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kari as applied to claim 1 above.

While disclosing applicant's invention of claim 1 above, Kari fails to disclose using SMS or a FACCH or SACCH channel. However, as noted in claim 6, FACCH and SACCH are known per se, and SMS was a notoriously well-known paging technique in GSM systems such as the standard recited by Kari (page 10 lines 9-14). As such the examiner takes Official Notice of such features, asserting that the notoriety of such features would have obviously motivated one of ordinary skill in the art at the time of the invention to add said features to Kari as they are standard uses/features of GSM.
